KARELIA
IKKUNA

The lighting in Karelia Ikkuna Oy's production facilities was renewed with Valtavalo's solution in autumn 2017. Previously, broken electronic ballasts and fluorescent tubes had to be replaced frequently. The old luminaires were removed and replaced with Valtavalo luminaires and 28W LED tubes.

“ We are really pleased with the new look of the facilities. In addition, the new lighting is maintenance-free, and we no longer have to worry about breakable ballasts.

- Jarmo Laakkonen, Service and maintenance, Karelia Ikkuna Oy
