

# LED-Pro

VERSATILE LUMINAIRE FOR OFFICES AND PUBLIC PREMISES  
WITH REPLACEABLE LED LIGHT SOURCE

## Versatile luminaire with replaceable LED light source for offices and public premises

### Operating conditions

LED-Pro is particularly well suited for general lighting in office spaces and public premises. LED-Pro with IP44 protection is splash-protected. Due to its opal acrylic cover with a satinised surface, it provides soft light that brightens up the room beautifully and efficiently.

### Installation and maintenance

LED-Pro can be surface-mounted on a ceiling and wall or suspended with a suspension track. The luminaire does not contain separate ballasts, so in addition to normal cleaning it doesn't require any maintenance other than replacing the LED tube when necessary. Valtavallo LED tubes are easily installed and replaced without any electrical work.

### Lifetime

When the luminaire is equipped with high-quality Valtavallo LED tubes, it results in a durable and carefree lighting solution for a wide range of environments. LED-Pro is made in Finland.
