

LED-Teva slim

OPEN-HOUSING LUMINAIRE WITH REPLACEABLE LIGHT SOURCES

Open-housing LED luminaire for industrial and public premises

Operating conditions

Typical applications of LED-Teva slim include large and high spaces, like stores, warehouses and industrial spaces, but it is applicable for all kinds of new installations and renovation installments, where a lot of light is needed.

Installation and maintenance

LED-Teva slim can be installed on ceiling surfaces or on suspension rails. The luminaire does not contain separate ballasts, so in addition to normal cleaning, it doesn't require other maintenance than replacing the LED tube when the lifetime has come to its end. Valtavallo LED tubes can be installed and replaced without any electrical work.

Long lifetime

LED-Teva slim is available for 1-3 LED tubes. For maximum lifetime, LED-Teva slim can be equipped with extremely long-lasting Valtavallo LED tubes.
