

Volkswagen car store Pörhön Autoliike Oy in Kajaani, Finland was renewed according to the brand requirements during spring 2017. Former store lighting with traditional fluorescent tubes was replaced with Valtavalo's flicker free G4 LED tubes that not only reach the required light level but also result in significant energy savings.

“ We have plenty of light now and it is of high quality, so all the details stand out well. Also our customers have thanked us for the bright new look of the store.”

- Sampo Valtonen, Car store manager, Pörhön Autoliike Oy, Kajaani, Finland
