

**postnord**

*PostNord site Hallsberg, Sweden changed from old fluorescent T5-tubes to a Valtavallo replaceable lightsource. In the sorting terminal of 12 500 m<sup>2</sup> the upgrade resulted in an increase of light approx. 20% and a cost saving of approx. 40%.*

*“The new lighting is perceived as much clearer and brighter against the old lighting. The staff who work there regularly are very happy with the change. The difference is like night and day as an employee expressed himself. Now we have replaced all the lamps with Valtavallo.”*

**Leif Byrstrand, PostNord Hallsberg, Sweden**
