

postnord

At Postnord's facility in Rosersberg, Stockholm, the whole area of 50,000 m² is illuminated with Valtavallo solutions. The goal was to have a maintenance-free and flexible solution with replaceable light source, where the lighting can be adjusted over time, without having to replace entire luminaires. **"The change resulted in electricity savings of over 40% and a clear improvement of the work environment."** / Nils-Olov Persson, PostNord Fastigheter.
