

Valtavallo implemented a comprehensive lighting reform at SOE Busproduction Finland Oy's production plant. The change was implemented on a turnkey basis and was scheduled for a production shutdown in July 2019. Employees have reported that the new lighting has improved work environment comfort and increased motivation.

“ There is now more light and it is of better quality. Employees both in the production and in the offices now work in high-quality LED light.

Saku Salminen, Environmental engineer, SOE Busproduction Finland Oy, Finland
