

In 2011 Valtavalon delivered the first LED tubes to production facilities of Oy Snellman Ab, a Finnish family company producing top quality meat and pork products for 60 years, and now (in 2017) a significant part of the facilities is illuminated with Valtavalon's LED solutions.

“ We've been using Valtavalon LED tubes for a few years now and found them durable and luminous. We have achieved significant savings with lower operating costs and reduced maintenance costs.”

- Markus Snellman, Technical Director, Oy Snellman AB, Pietarsaari, Finland
