“ Valtavalo Vaivaton - lighting as a service model made it possible to renew the lighting at our production facilities without any investments. Compared to our old solution we earn money every month and we don't need to do anything to the lighting at least for five years: maintenance costs have gone away and we've reached energy savings up to 70%. In addition, both amount and quality of light have increased.”

- Mika Okkonen, Chairman of the Board, Imagon Ltd
